Project Description:

Private and city funded project The client needed us for grading and seeding. The dirt was full of large to small rocks the more you excavated. We graded dirt while fences were being installed. Upon communicating with the team, we were able to make a recommendation to install sod; which was approved and used an up-sale feature for the housing development. TCG put in a work order to have us trim and install trees along the property's exterior. Upon the completion of that task another work order was put in for VaceTime to come in the spring of 2025 to install additional trees and spring seeding for the units.
