

**Project Description:**

The client wanted to make the outside of their office into something more appealing to the eye and still required minimal maintenance. VaceTime was hired to manage this project, which was completed in 2021. We first created the design for this project to resemble the client's team holiday party in Mount Pocono, PA. VaceTime removed all the overgrown vegetation, removed two deep rooted shrubs, cultivated the soil, and treated the area with herbicide. VaceTime then leveled the soil and contained future growth of vegetation using weed block. VaceTime then planted three new shrubs, followed by the addition of mulch, stones and boulders in layers to resemble snow coming down a hill.
